

VACCINATION SCHEDULE

Which vaccinations?

- **PARAMYXO**

- o All racing pigeons should be vaccinated. This vaccination is valid for 1 year.
- o Widowers: best vaccinate in October or January or during breeding.
- o Hens and breeders: best vaccinate against herpes Paramyxo 2 weeks before pairing.
- o Youngsters: from the age of 4-6 weeks instead of 6 to 8 weeks..

- **POX**

- o Can be done with the brush method or with an injection.
- o For yearlings and old pigeons best at the same time as Paramyxo.
- o For youngsters 3 weeks after the vaccination against Rota Paramyxo.

- **COMBINATION VACCINE HERPES AND PARAMYXO**

- o Is a good vaccine to support herpes in pigeons.

- **PARATHYPHUS OR SALMONELLA VACCINE**

- o If salmonella has been diagnosed, it is best to vaccinate your pigeons against salmonella for a few years in a row and every 6 months.

WHEN TO VACCINATE?

BREEDERS

- o October: herpes Paramyxo 2 weeks before pairing
- o If salmonella problems also vaccinate against salmonella 4 weeks before pairing and 6 months later.
