

## VACCINATION SCHEDULE

### WHICH VACCINATIONS?

#### **PARAMYXO**

All racing pigeons must be vaccinated. This vaccination is valid for 1 year.

Bachelors: best to vaccinate in October or January or during breeding.

Hens and breeders: best to vaccinate against herpes Paramyxo 2 weeks before pairing.

Youngsters: from the age of 4-6 weeks.

#### **POX**

o Can be done using the brush method or by injection.

o For yearlings and old birds, best to do this at the same time as Paramyxo.

o For youngsters, 3 weeks after vaccination against Rota Paramyxo.

#### **COMBINATION VACCINE HERPES AND PARAMYXO**

o Is a good vaccine against herpes in pigeons.

#### **PARATHYPHUS OR SALMONELLA VACCINE**

o If salmonella has been diagnosed, it is best to have your pigeons vaccinated against salmonella every 6 months for a few years.

### WHEN TO VACCINATE?

#### **BREEDERS**

November: 2 weeks before pairing against herpes Paramyxo.

If salmonella problems also vaccinate against salmonella 5-6 weeks before pairing and 6 months later.

#### **ONE-YEAR-OLD AND OLD RACING PIGEONS**

Paramyxo and pox simultaneously in October or January.

Salmonella: February.

#### **YOUNGSTERS**

4 weeks old: Rota Paramyxo.

3 weeks later: Rota Paramyxo.

3 weeks later: pox.

3 weeks later: Salmonella if problems occur.
